FOUCAULT'S PENDULUM EXPERIMENT TO SHOW THE EARTH'S AXIAL ROTATION.

PENDULUM

The timeless play of balance and energy

Although inspired by Newton's cradle, demonstrating the conservation of momentum and energy, this glass version should be handled with care. The playful and highly variable collection provides space for your own creativity. Physics, aesthetics and craft all come together to remind us that everything is in perpetual motion.

All Bomma products are hand-made from mouth-blown lead-free crystal. Therefore any small bubbles, non-melts and irregularities in the glass are both proof and a characteristic feature of this traditional craft.

The Pendulum Collection is made by underlying colored glass technology. Thanks to the manual process of blowing underlay glass, each piece is an original. Individual products may vary slightly in intensity, hue or even color. This is an accompanying characteristic of the traditional underlay glass technology.
