COLLECTION

Il principio è semplice: verniciare decorando

Film transfer prestampato con pigmenti organici fotosensibili e resine di cellulosa, avvolto interamente sul profilo. Il metodo di decorazione o stampa utilizzato è quello per sublimazione o stampa a caldo. La sublimazione è il passaggio fisico di una materia dallo stato solido a quello aeriforme senza passare dallo stato liquido. Processo produttivo non inquinante: il trasferimento è pulito e secco, senza residui di materiale colorante o residui chimici, acqua di rifiuto: il personale, i boschi, le montagne e i mari ringraziano.

Corpo: alluminio estruso

Test in nebbia salina: > 1500 ore

The principle is simple: coating decorating

Pre-printed film transfer with organic photo sensitive pigments and cellulose resin, completely wrapped around the profile. The decoration or printing method used is the sublimation or heat printing. Sublimation is the physical process: a material changes from a solid condition into a gas condition without ever turning into a liquid condition. Production process is not polluting: the transfer is clean and dry, no colour material waste, no chemical waste, no water waste: personal, woods, mountains and seas are grateful.

Body: aluminium extruded

Test in saline mist: > 1500 hours

Le principe est simple: la peinture décorative

Un film pour transfert pré-imprimé avec des pigments organiques photosensibles et une résine de cellulose enveloppent entièrement le profil. La méthode de décoration ou d'impression utilisée est celle de la sublimation ou impression à chaud. La sublimation est le passage physique d'une matière de l'état solide à l'état gazeux sans passer par l'état liquide. C'est un procédé de production non polluant: le transfert est précis et sec, sans résidu de matériels colorants ou chimiques, sans gaspillage d'eau: les personnes, les forêts, les montagnes et les océans apprécient.

Corps: aluminium extrudé

Test dans le brouillard salin: > 1500 heures

El principio es sencillo: pintar decorando

La película plástica ya estampada con pigmentos orgánicos fotosensibles y resinas de celulosa, envuelven completamente el perfil. El método de decoración o impresión utilizado es el de sublimación o impresión a calor. La sublimación es el paso físico de una materia del estado sólido al gaseoso sin pasar por el estado líquido. Proceso productivo no contaminante: él es limpio y seco, sin residuos de material colorante u residuos químicos, agua de residuo: el personal, los bosques, las montañas y los mares agradecen.

Cuerpo: aluminio extrusionado

Test en neblina salinizada: > 1500 horas

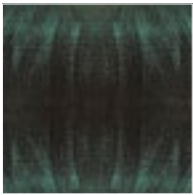

Das Prinzip ist einfach: lackieren und dekorieren

Es wird zuerst ein Kunststofffilm mit organischen, lichtempfindlichen Pigmenten und Zellharz bedruckt, mit dem das ganze Profil eingehüllt wird. Die Dekorations- oder Druckmethode nennt man Sublimation oder Warmumformen. Sublimation ist der physische Übergang eines Stoffes vom festen Zustand zum gasförmigem Zustand, ohne einen flüssigen Zustand zu haben. Das ist ein umweltfreundlicher Herstellungsprozess, der sauber und trocken ist, ohne Materialrückstand, Chemierückstand und Abwasser. Die Menschen, der Wald, die Berge und die Meere danken uns dafür.
