## ZP 22000 zrcadla / mirrors

Demands on bathroom furnishing keep getting high and the original oasis of hygiene has been changing into a relaxing center. Not only there are hydro massage tubes but also steam cabins, sweat rooms, high-tech toilets, and other technological features. One of these are the illuminated LED mirrors.

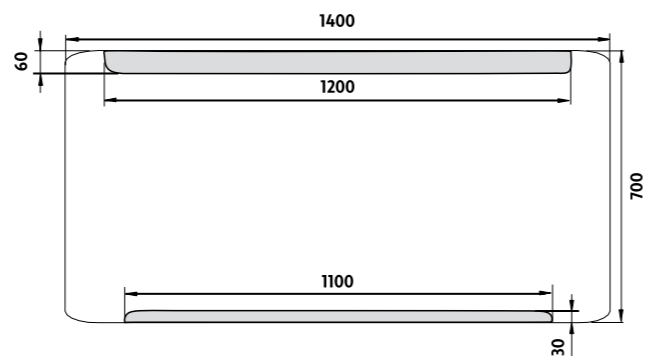

New technology ensures perfect lighting by using acrylic glass – plexiglass placed behind the mirror. High-performance LED chips are used. Construction is made of aluminium frame of 32x19 mm, glass of the mirror is 5 mm thick. Connection 220-240 V. Sensor ON/OFF is not part of the product. Connection to wiring, turning on through switch of light in the room. Color temperature - day light, bright is chosen, 6000 K. IP 44. Lumen 1260, output 10,5 W. The lifetime of LED diodes is up to 50.000 hours.

## ZP 9000

ZP 9002

The new technology of lighting using acrylic glass (plexiglass) behind the mirror glass. Mirror is illuminated by LED strips hidden in PVC tube („U“ profile 20x20 mm), which is placed under sanded sides of the mirror. The light does not only go through glass but it also goes out of the sides of the mirror. 20 mm of the side of the mirror lights fully creating an interesting light effect. Construction is made of aluminium frame 32x19 mm. Glass of the mirror is 5 mm thick. It is possible to attach the mirror horizontally or vertically. Connection 220-240 V. IP 44. With no switch, connection to wiring, turning on through switch of light in the room. High-performance LED chips are used. Color temperature – day light, bright is chosen. Temperature 6000 K. The lifetime of the LED is up to 50.000 hours.

**LED zrcadlo 600x600 s dotykovým senzorem**  
Koupelnové podsvícené LED zrcadlo. Spotřeba-výkon 35W. Možnost nastavení barevné teploty svícení od **2700K - 6000K**.  
**LED mirror 600x600 with touch sensor**  
Backlit LED bathroom mirror. Power consumption 35W. Color temperature setting from **2700K - 6000K**.

# LED

## ZP 18000

ZP 18001

The new technology of lighting using acrylic glass (plexiglass) behind the mirror glass. Construction is made of aluminium frame of 32x19 mm. Glass of the mirror is 5 mm thick. It is possible to attach the mirror horizontally or vertically. Connection 220-240V. IP 44. With no switch, connection to wiring, turning on through switch of light in the room. High-performance LED chips are used. Color temperature - day light, bright is chosen. Temperature 6000 K. The lifetime of the LED is up to 50.000 hours.

Aluminium frame

### Snadné čištění

Snadné čištění. Montážní systém umožňuje snadné vyjmutí produktu. To usnadňuje čištění produktu a jeho okolí za ním.

### Easy clean

Easy to clean. The mounting system allows easy removal of the product. This makes it easier to clean the product and the surrounding area behind it.

### Plexiglass

Plexiglass pomáhá zesílit a rozptýlovat světlo, čímž způsobuje téměř dokonalé homogenní svícení.

### Plexiglass

Plexiglass helps to amplify and scatter light, producing almost perfect homogeneous lighting.

**Vysoká kvalita  
povrchové úpravy**

**High quality  
surface finishes**

**2700k-6000K**

Možnost nastavení barvy teploty od 2700K (teplá bílá) do 6000K (studená bílá)

**2700K-6000K**

Plexiglass helps to amplify and scatter light, producing almost perfect homogeneous lighting.

**Dotykový senzor**

S pamětí bez stmívače.

**Touch sensor**

Touch sensor with memory without dimmer.
